## ELIXIR Industries Eliminator Series

Thermal Outswing Door

ELIXIR® Eliminator Series Thermal outswing door is constructed from vinyl laminated galvanized steel. Our Eliminator Series is the first door in the industry to truly offer a full thermal break unit. We continue to offer products that are innovative and respond to the needs of our industry, and the Eliminator Series is one of the results of that commitment. Our thermal break eliminates transfer of cold and frost from the exterior to interior while eliminating condensation due to differences between exterior and interior climates. This door comes with weatherstripping on both the jamb and the door to create a double seal that protects against air, light, and water penetration. Other features include a highly energy efficient polyurethane foam insulation, high R-Values, and a vinyl sweep. With a wide range of available sizes and window options, the ELIXIR Eliminator Series door will fit most of your application needs.

Eliminator Door With  
Optional 9-lite window

### Key Features

#### Vinyl Laminated Galvanized Steel (optional)

- Self Lubricating Bushings

# ELIXIR INDUSTRIES

SINCE 1948

## ELIXIR Industries

We take pride in our recent listing in the "Top 100 Door Manufacturers" edition of Door and Window Magazine. Select divisions will custom build exterior doors to customer specifications.

ELIXIR offers a wide variety of entrance door configurations and options in patio doors, french doors, single and double sidelite doors, and transoms.

Our door cores are produced at an ELIXIR division located in a key area of the country to serve our customers. Division 34 in Crossville, TN produces a variety of finishes including our popular 10mil vinyl-clad series.
