Power Converters

Used in the RV industry; Elixir Power Converters have proven to be clean, quiet, and powerful. We are able to provide a product that will meet or, in many cases, exceed your expectations. Our converters are Class B Certified by both ETL and the FCC.

Features:

- **Automatic Shutoff:** Protects against overload.
- **Stable DC Output:** During an overload situation; this eliminates “power flicker” and saves life on appliances by maintaining a constant DC output.
- **Audible Buzzer:** Two distinct tones to clearly indicate overload or short circuit.
- **Constant Battery Charging:** A unique feature achieved by separate supply lines between DC output and battery charge. In a no-load situation, full unit amperage is diverted to battery recharge. Under a load situation, amperage diverted to battery recharge is adjusted depending on the load level, but always maintains a constant of 1 amp to extend battery life.
- **Reverse Polarity Protection:** If battery cables are connected incorrectly, a fuse in the converter will blow and protect the circuit board
- **Reduced Battery Leakage:** Delivers 8 milli-amps leakage versus 20 milli-amp leakage in competitive
- **Quiet Operation:** Fan bearing and thermal control unit provides extremely quiet operation.
